HEATING INSTRUCTIONS

Please Note: These instructions are intended as guidelines. All microwave, convection and conventional ovens vary in power and temperature. All cooking times and oven temperatures are approximate and may need to be adjusted.

MICROWAVE FROM THAWED:
1. Remove outer package (if present), leaving product wrapper intact.
2. Cook on high power for 45 seconds.
3. Check temperature. Product is ready to consume when an internal temperature of 165° F is reached.
4. Continue heating for 15-20 seconds until 165° F is reached.
5. Let sit for 1 minute, remove from wrapper and consume within 4 hours.
*Use caution when handling, food will be hot.

OVEN FROM THAWED:
1. Preheat oven to 325° F.
2. Remove all packaging and place on baking sheet.
4. Check temperature. Product is ready to consume when an internal temperature of 165° F is reached.
5. Continue heating for 5 minutes until 165° F is reached.
6. Let sit for 5 minutes and consume within 4 hours.
*Use caution when handling, food will be hot.
