How will you bring local foods into the cafeteria with your next food purchase?

‘Local’ cannot be used as a product specification in a school food solicitation, but there are many ways to buy local products. This chart presents several options for including your desire for local foods in the procurement process.

**Tip:** If your purchase is valued under $10,000, it is below the Federal micropurchase threshold. This means that as long as your State or local rules aren’t more restrictive, you can purchase products under this threshold without obtaining multiple bids.

**Is your purchase valued over the small purchase threshold that applies to you?**

**NO**

- You can conduct an informal procurement.
  - Here are options for targeting local products in an informal procurement.
    - With an informal procurement, you may contact ONLY vendors offering local products.

**YES**

- You should issue an invitation for bids (IFB). Here are options for targeting local products in an IFB.
  - In an formal procurement, you can incorporate technical requirements, product specifications, or geographic preference in your solicitation to target local products.
  - With an IFB, you may contact ONLY vendors offering local products.

**Tip:** When conducting an informal procurement, be sure to document specifications and record quotes.

**Tip:** The Federal Small Purchase Threshold is $250,000. Many States and localities set more restrictive thresholds, so be sure to contact your State agency to find out what the applicable threshold is.

**You can conduct an formal procurement. Will price be the only evaluation factor?**

**YES**

- You should issue a request for proposal (RFP). Here are options for targeting local products in an RFP.
  - With an RFP, you can also use evaluation criteria related to local products.

**NO**

- You can conduct an informal procurement.
  - Here are options for targeting local products in an informal procurement.
    - With an informal procurement, you may contact ONLY vendors offering local products.

Informal Procurement

The primary difference between formal and informal procurement is that a formal procurement must be publicly advertised. This means that when conducting an informal procurement, you are in control of who you request quotes from and you can choose to make requests only from vendors supplying local products. If there are not three local vendors to request quotes from, you can request products from both local and nonlocal sources and target local products by using product specifications, technical requirements, or geographic preference. When conducting an informal procurement, you can collect quotes over the phone, via email, or even at the farmer’s market. Just be sure to document your requirements, specifications, and quotes in writing.

Technical Requirements and Product Specifications

In any type of procurement, you can use technical requirements and product specifications to target local products. In order for a vendor to be considered responsive and responsible, the vendor must meet the product specifications and other requirements outlined in your solicitation. Consider using requirements or specifications that target local products, such as:

- Freshness (e.g., “delivered within 48 hours of harvest”)
- Harvest techniques
- Production practices
- State of origin labeling, and/or
- Ability to provide farm visits or visit classrooms.

Specifications such as these help increase the chances of getting products that are produced nearby, but do not explicitly require that the products be local. When using specifications related to particular crop varieties and freshness factors, be sure not to overly restrict competition; do the market research necessary to ensure there are multiple vendors able to meet your specifications.

Evaluation Criteria

In evaluating an RFP, you are not just considering price, but also the whole package of services and/or products the vendor is offering. Therefore, RFPs allow you to give weight to factors in addition to price. RFPs should describe all evaluation criteria, their relative importance, and how they will be used to assess the proposals. The weight of each evaluation factor distinguishes which elements are most important, but elements included as evaluation criteria are not requirements.

You can use some of the same measures mentioned in the technical requirements and product specifications section as evaluation criteria, noting that if these factors are used as evaluation criteria, their relative importance will be considered when reviewing proposals. If they are used as technical requirements or product specifications, the factors must be met in order for the bid or proposal to be considered.

Geographic Preference

The 2008 Farm Bill directed USDA to allow child nutrition program operators to use a geographic preference for the procurement of unprocessed, locally grown or raised agricultural products. See the resources listed below for more information.
